PROJECTS

- **Personal Portfolio**

This is my personal portfolio website that I have designed and developed myself from scratch. I have used styled components, react scroll and media queries to make the website responsive and to give the user a pleasant experience.

- **Covid App**

This is a project that uses a covid api to show the current covid information about different countries with a search functionality so that users can search information about specific countries.

- **Movie Trailer App**

-

This is a project that uses a movie api to show the user new movies and also lets the user to search movies and watch trailer of those movies within the website.
